

CORROSION CREATOR SET

Quick Tips

RUSTY AIRCRAFT

AVIÓN OXIDADO

1

1. Here you will be shown how to use the new U-RUST products to work on the tail-plane of a Hellcat.

Emplearemos el plano de cola de un Hellcat para trabajar con los nuevos productos de óxidos.

2. The colour Black Oxide Transparent A.MIG-2253 was chosen for this step.

Escogemos el Black Oxide Transparent (A.MIG-2253).

3. Always be sure to thoroughly shake the bottle for proper results.

Agitamos el contenido.

4. Black Oxide Transparent has a thick consistency.

El Black Oxide Transparent presenta una consistencia pastosa.

5. This colour was applied directly onto the surface with a round brush.

Lo aplicamos directamente con un pincel redondo sobre la superficie que nos interesa oxidar.

6. The Black Oxide Transparent was then allowed to dry completely.

Dejamos secar completamente el Black Oxide Transparent.

7. The next step was to apply Rust Reactor Type 1 A.MIG-2257 to the right panel using a round brush.

A continuación aplicamos el Rust Reactor Type 1 (A.MIG-2257) con un pincel redondo en el panel derecho.

8. The same brush was then used to apply Rust Reactor Type 2 A.MIG-2258 on the central panel.

Con el mismo pincel aplicamos el Rust Reactor Type 2 (A.MIG-2258) en el panel central.

9. A mixture of both Rust Reactor types was applied to the left panel. *Realizamos una mezcla con los dos reactivos y la aplicamos en el panel izquierdo.*

10. Once the surface had dried, the results obtained by applying the two reactors over the Black Oxide Transparent are strikingly realistic.

Al secar la superficie comprobamos el resultado de aplicar los reactivos sobre el Black Oxide Transparent.

11, 12. If you would like to apply a more intense rust effect, simply apply additional layers of Rust Reactor products.

Si queremos aumentar la intensidad de la oxidación repetimos la aplicación de los reactivos.

13. Once dry, you can see how a naturally varied and attractive range of rust tones has easily been created with an unmatched level of authenticity.

Una vez secos obtenemos una variada y atractiva gama de óxidos.
